FULL PAPERS

PAGE

Biosynthesis and Degradation

Species differences in the conjugation of 4-hydroxy-3-methoxyphenylethanol with glucuronic acid and sulphuric acid.
By K. P. Wong 33

Oxidation of cholesterol analogues by mitochondrial preparations of steroid-hormone-producing tissue.
By J. R. Arthur, H. A. F. Blair, G. S. Boyd, J. I. Mason & K. E. Suckling 47

Studies on the response of cholesterol biogenesis to feeding in rats. Evidence against the existence of diurnal rhythms.
By R. Fears & B. Morgan 53

The metabolism of steroids in the fatty liver induced by orotic acid feeding.
By M. Carrella, I. Björkhem, J.-Å. Gustafsson, K. Einarsson & K. Hellström 89

Bioenergetics

The properties of the primary electron acceptor in the photosystem I reaction centre of spinach chloroplasts and its interaction with P700 and the bound ferrodoxin in various oxidation–reduction states.
By M. C. W. Evans, C. K. Sihra & R. Cammack 71

Subcellular Structures

Studies on amino acid-incorporating activity of native rat liver rough membrane and that reconstituted *in vitro*.
By N. de Groot, I. J. Yuli, H. H. Czosnek, Y. Shiklosh & A. A. Hochberg 23

Differences between newly formed and recycled free small ribosome subunits in liver cytoplasm.
By R. H. Hinton & B. M. Mullock 97

The metabolism and binding of catecholamines by the hepatic microsomal mixed-function oxidase of the rat.
By D. McKillop & G. Powis 135

Cellular Interactions and Control Processes

Regulation of phosphoenolpyruvate carboxykinase (GTP) in adipose tissue *in vivo* by glucocorticoids and insulin.
By O. Meyuhas, L. Reshef, J. M. Gunn, R. W. Hanson & F. J. Ballard 1

PAGE

The effect of insulin and glucocorticoids on the synthesis and degradation of phosphoenolpyruvate carboxylase (GTP) in rat adipose tissue cultured *in vitro*.
By O. Meyuhas, L. Reshef, F. J. Ballard & R. W. Hanson 9

Haemolysis induced by tyrosine crystals. Modifiers and inhibitors.
By L. A. Goldsmith 17

Characterization of the binding of human growth hormone to microsomal membranes from rat liver.
By A. C. Herington, N. Veith & H. G. Burger 61

Animal liver tryptophan pyrrolases. Absence of apoenzyme and of hormonal induction mechanism from species sensitive to tryptophan toxicity.
By A. A.-B. Badawy & M. Evans 79

The effect of cobalt on the uptake of plasma iron by the liver.
By V. J. Cunningham, F. De Matteis & M. D. Stonard 105

Induction of benzo[*a*]pyrene mono-oxygenase in liver cell culture by the photochemical generation of active oxygen species. Evidence for the involvement of singlet oxygen and the formation of a stable inducing intermediate.
By A. J. Paine 109

Basal and thyroliberin-stimulated prolactin synthesis in single-cell cultures and in populations of rat pituitary cells.
By K. M. Gautvik & S. Fossum 119

Anti-ketogenic effect of glucose in the lactating cow deprived of food.
By R. J. Treacher, G. D. Baird & J. L. Young 127

Effects of calcium ions and the bivalent cation ionophore A23187 on the agglutination and fusion of chicken erythrocytes by Sendai virus.
By C. A. Hart, D. Fisher, T. Hallinan & J. A. Lucy 141

Metabolism in Whole Organisms

The metabolic fate of intravenously injected peptide-bound chondroitin sulphate in the rat.
By K. M. Wood, C. G. Curtis, G. M. Powell & F. S. Wusteman 39

RAPID PAPERS

PAGE

Biosynthesis and Degradation

Serum glycoprotein synthesis after partial hepatectomy in the rat.
By F. Serafini-Cessi 153

Non-human primate platelets and arterial tissue cannot convert preformed [^{14}C]lanosterol into [^{14}C]cholesterol *in vivo*.
By A. Derksen, M. M. Meguid & P. Cohen 157

PAGE

Bioenergetics

The interaction of reduced nicotinamide–adenine dinucleotide phosphate with reduced nicotinamide–adenine dinucleotide–ubiquinone reductase from bovine heart mitochondria.
By C. I. Ragan 149

Contents of Volume 158, No. 2

FULL PAPERS

PAGE

Biosynthesis and Degradation

The biochemical pathway for the breakdown of methyl cyanide (acetonitrile) in bacteria.
By J. L. Firmin & D. O. Gray 223

Phosphatidic acid biosynthesis in rat liver mitochondria and microsomal fractions. Regulation of fatty acid positional specificity.
By K. S. Bjerve, L. N. W. Daae & J. Bremer 249

The formation of exchangeable sulphite from adenosine 3′-phosphate 5′-sulphatophosphate in yeast.
By L. G. Wilson & D. Bierer 255

Triacylglycerol biosynthesis in the adipose tissue of the obese–hyperglycaemic mouse.
By S. C. Jamdar, D. Shapiro & H. J. Fallon 327

Role of protein degradation in the growth of livers after a nutritional shift.
By R. D. Conde & O. A. Scornik 385

Synthesis of δ-aminolaevulinate synthase by isolated liver polyribosomes.
By M. J. Whiting 391

The composition of an unusual precursor of 50S ribosomes in a mutant of *Escherichia coli*.
By F. Markey, P. F. G. Sims & D. G. Wild 451

Ribonucleic acid synthesis in the renal cortex at the initiation of compensatory growth.
By P. Cortes, N. W. Levin & P. R. Martin 457

Bioenergetics

A kinetic analysis of the changes in fluorescence on the interaction of 8-anilinonaphthalene-1-sulphonate with submitochondrial particles.
By N. Gains & A. P. Dawson 295

PAGE

The effects of diphenyleneiodonium on mitochondrial reactions. Relation of binding of diphenylene[^{125}I]iodonium to mitochondria to the extent of inhibition of oxygen uptake.
By S. J. Gatley & H. S. A. Sherratt 307

The effects of diphenyleneiodonium and of 2,4-dichlorodiphenyleneiodonium on mitochondrial reactions. Mechanism of the inhibition of oxygen uptake as a consequence of the catalysis of the chloride/hydroxyl-ion exchange.
By S. J. Gatley & H. S. A. Sherratt 317

Transport of calcium ions by Ehrlich ascites-tumour cells.
By Y. Landry & A. L. Lehninger 427

Subcellular Structures

The effect of lead on the calcium-handling capacity of rat heart mitochondria.
By D. R. Parr & E. J. Harris 289

Cellular Interactions and Control Processes

Response of poly(adenylic acid) polymerase in rat liver nuclei and mitochondria to starvation and re-feeding with amino acids.
By S. T. Jacob, K. M. Rose & H. N. Munro 161

Effect of 2-allyl-2-isopropylacetamide on poly-(adenylic acid)-containing ribonucleic acid.
By M. K. Sardana & G. Padmanaban 169

Ovarian adenosine 3′:5′-cyclic monophosphate-dependent protein kinase(s). Regulation by choriogonadotropin and lutropin in rat ovarian cells.
By M. R. Clark, S. Azhar & K. M. J. Menon 175

GENERAL BOOKBINDING CO.
75 47488 2 013 1 C 4481
QUALITY CONTROL MARK

PAGE

The effect of glucose, insulin and adrenaline on glycerol metabolism *in vitro* in rat adipose tissue.
By M. C. Domínguez & E. Herrera 183

Glucose metabolism in perfused skeletal muscle. Effects of starvation, diabetes, fatty acids, acetoacetate, insulin and exercise on glucose uptake and disposition.
By M. Berger, S. A. Hagg, M. N. Goodman & N. B. Ruderman 191

Glucose metabolism in perfused skeletal muscle. Pyruvate dehydrogenase activity in starvation, diabetes and exercise.
By S. A. Hagg, S. I. Taylor & N. B. Ruderman 203

The effect of intracellular calcium ions on adrenaline-stimulated adenosine 3′:5′-cyclic monophosphate concentrations in pigeon erythrocytes, studied by using the ionophore A23187.
By A. K. Campbell & K. Siddle 211

Comparison of renal and hepatic glutathione *S*-transferases in the rat.
By N. Kaplowitz, G. Clifton, J. Kuhlenkamp & J. D. Wallin 243

Androgen-dependent synthesis of basic secretory proteins by the rat seminal vesicle.
By S. J. Higgins, J. M. Burchell & W. I. P. Mainwaring 271

Arachidonic acid release from diacyl phosphatidylethanolamine by human platelet membranes.
By R. L. Jesse & P. Cohen 283

Inosine-stimulated insulin release and metabolism of inosine in isolated mouse pancreatic islets.
By K. Capito & C. J. Hedeskov 335

The regulation of folate and methionine metabolism.
By H. A. Krebs, R. Hems & B. Tyler 341

Effects of hormones on protein and amino acid metabolism in mammary-gland explants of mice.
By L. D. Anderson & J. A. Rillema 355

PAGE

Intracellular enzymes of collagen biosynthesis in rat liver as a function of age and in hepatic injury induced by dimethylnitrosamine. Changes in prolyl hydroxylase, lysyl hydroxylase, collagen galactosyltransferase and collagen glucosyltransferase activities.
By J. Risteli & K. I. Kivirikko 361

Intracellular enzymes of collagen biosynthesis in rat liver as a function of age and in hepatic injury induced by dimethylnitrosamine. Purification of rat prolyl hydroxylase and comparison of changes in prolyl hydroxylase activity with changes in immunoreactive prolyl hydroxylase.
By J. Risteli, L. Tuderman & K. I. Kivirikko 369

Studies on the relative biopotencies and intestinal absorption of different apo-β-carotenoids in rats and chickens.
By R. V. Sharma, S. N. Mathur & J. Ganguly 377

The effect of intralysosomal sucrose storage on the turnover of hamster fibroblast lysosomal and Golgi-apparatus enzymes.
By M. J. Warburton & C. H. Wynn 401

Precocious development of UDP-glucuronyltransferase activity in chick-embryo liver after administration of adrenocorticotropic hormone and of certain 11β-hydroxy corticosteroids.
By J. E. A. Leakey, G. J. Wishart & G. J. Dutton 419

Transport of sugars in chick-embryo fibroblasts. Evidence for a low-affinity system and a high-affinity system for glucose transport.
By C. W. Christopher, M. S. Kohlbacher & H. Amos 439

Development

Uptake of mevalonate and acetate during plastid development.
By A. R. Wellburn & R. Hampp 231

Polyamine and ornithine metabolism during the germination of conidia of *Aspergillus nidulans*.
By L. Stevens, I. M. McKinnon & M. Winther 235

Properties and development regulation of an α-D-galactosidase from *Dictyostelium discoideum*.
By D. C. Kilpatrick & J. L. Stirling 409

RAPID PAPERS

PAGE

Subcellular Structures

Plasma-membrane components can be removed from isolated lymphocytes by the bile salts glycocholate and taurocholate without cell lysis.
By G. Holdsworth & R. Coleman 493

Identification of a sialoglycopeptide released by self-digestion from human erythrocyte membranes.
By A. Brovelli, G. Pallavicini, F. Sinigaglia, C. L. Balduini & C. Balduini 497

Cellular Interactions and Control Processes

Liposomal retention of a modified anti-inflammatory steroid.
By I. H. Shaw, C. G. Knight & J. T. Dingle 473

Localization of thyroid peroxidase and the site of iodination in rat thyroid gland.
By H. H. Edwards & M. Morrison 477

Mammary glucocorticoid receptor of mice in pregnancy and in lactation.
By P. Chomczynski & L. Zwierzchowski 481

PAGE

Inhibition of polyamine accumulation and deoxyribonucleic acid synthesis in regenerating rat liver.
By H. Pösö & J. Jänne 485

Failure of cell-free system from rabbit reticulocytes to remove iron from transferrin.
By E. H. Morgan 489

Cholinergically stimulated phosphatidylinositol breakdown in parotid-gland fragments is independent of the ionic environment.
By L. M. Jones & R. H. Michell 505

3-Oxo acid coenzyme A-transferase in normal and diabetic rat muscle.
By A. Fenselau & K. Wallis 509

Development

Leucine and D-3-hydroxybutyrate as lipid precursors in developing rat spinal cord and liver.
By R. B. Ramsey 501

Contents of Volume 158, No. 3

FULL PAPERS

PAGE

Biosynthesis and Degradation

Neuronal *N*-acetyl-β-D-glucosaminidase. Evidence for its biosynthesis *in vitro*.
By J. A. Khawaja & O. Z. Sellinger 513

The synthesis of glycosaminoglycans by cultures of rabbit corneal endothelial and stromal cells.
By B. Y. J. T. Yue, J. L. Baum & J. E. Silbert 567

Incorporation of choline and ethanolamine into phospholipids in germinating soya bean.
By C. W. Dykes, J. Kay & J. L. Harwood 575

High rates of [1-^{14}C]acetate incorporation into the lipid of isolated spinach chloroplasts.
By P. G. Roughan, C. R. Slack & R. Holland 593

Protein synthesis in salivary glands of *Drosophila hydei* after experimental gene induction.
By J. F. J. G. Koninkx 623

Bioenergetics

Adenosine triphosphate-evoked catecholamine release in chromaffin granules. Osmotic lysis as a consequence of proton translocation.
By R. P. Casey, D. Njus, G. K. Radda & P. A. Sehr 583

PAGE

Cellular Interactions and Control Processes

Altered polyamine metabolism in the PRO/Re strain of inbred mice.
By C.-A. Manen, R. L. Blake & D. H. Russell 529

Adenylate cyclase, guanylate cyclase and cyclic nucleotide phosphodiesterases of guinea-pig cardiac sarcolemma.
By P. J. St. Louis & P. V. Sulakhe 535

Testosterone and 6-*N*,2′-*O*-dibutyryladenosine 3′:5′-cyclic monophosphate stimulate protein and lysosomal enzyme secretion in rat seminal vesicle.
By H. Koenig, C. Y. Lu & R. Bakay 543

The effects of added purines on urate and purine synthesis *de novo* by isolated chick liver, kidney and lymphoid cells.
By P. Badenoch-Jones & P. J. Buttery 549

PAGE

Phospholipid turnover in *Torpedo marmorata* electric organ during discharge *in vivo*.
By J. E. Bleasdale, J. N. Hawthorne, L. Widlund & E. Heilbronn 557

Glucosamine metabolism in regenerating rat liver.
By N. Akamatsu, H. Nakajima & S. Miyata 589

PAGE

Activities and some properties of adenylate cyclase and phosphodiesterase in muscle, liver and nervous tissues from vertebrates and invertebrates in relation to the control of the concentration of adenosine 3′:5′-cyclic monophosphate.
By J. R. S. Arch & E. A. Newsholme 603

RAPID PAPERS

PAGE

Biosynthesis and Degradation

Uptake and metabolism of tryptophan by the isolated perfused guinea-pig mammary gland.
By B. Mepham, A. R. Peters & S. R. Davis 659

Bioenergetics

Lowered respiratory activity in hypo-osmotically shocked mitochondria without loss of cytochrome *c*.
By M. C. Barrett, D. J. Mills & A. A. Horton 635

Subcellular Structures

The intracellular distribution of arylsulphatase C and oestrogen sulphatase activities in rat kidney and spleen.
By S. B. Thomas & F. A. Rose 631

Cellular Interactions and Control Processes

Binding of diethylstilboestrol to deoxyribonucleic acid by rat liver microsomal fractions *in vitro* and in mouse foetal cells in culture.
By G. M. Blackburn, M. H. Thompson & H. W. S. King 643

PAGE

Poly(ethylene glycol), surface potential and cell fusion.
By B. Maggio, Q. F. Ahkong & J. A. Lucy 647

Changes in the distribution of intramembranous particles in hen erythrocytes during cell fusion induced by the bivalent-cation ionophore A23187.
By J. Vos, Q. F. Ahkong, G. M. Botham, S. J. Quirk & J. A. Lucy 651

Increase in sialic acids removable by neuraminidase during the shape change of platelets.
By M. Motamed, F. Michal & G. V. R. Born 655

Development

Selective resistance to desiccation of nuclear ribonucleic acid synthesis in isolated nuclei of *Artemia salina* embryos during pre-emergence development.
By D. de Chaffoy & M. Kondo 639
